

A Powerful Patient Registry

Your family's journey with Gastric Cancer can help researchers learn about the patient experience and move us closer to promising treatments. This data is vital to improving treatments and finding cures. No Stomach For Cancer, along with their peers and global partners, encourage patients from around the world to unite in this effort.

1 Join Gastric Cancer Patients Around the World

Share yours or your loved one's health information in a registry that safeguards your privacy and ensures that you control your information. Opt in or out at any time from the registry.

2 Connect with Clinical Trials

Take health surveys and learn about the experiences of others who are affected by Gastric Cancer. See how your family's health information fits into the larger picture of the Gastric Cancer experience around the globe. Receive notice of clinical trial recruitment and the latest news in Gastric Cancer research.

3 Help Advance Research & Treatments

Patient data is critical to development and approval of new treatments. This registry will be made available to researchers and support clinical trials for promising therapies. Be prepared to add your data and help build on this momentum.

**Empower
Research.
Find Cures.**

With your help, researchers can better understand the experience of Gastric Cancer patients while discovering potential commonalities and differences across cancers. The Global Gastric Cancer Registry will provide a safe and private way to help overcome knowledge gaps faced by researchers. It offers ONE data location, accessible by families, organizations, researchers and companies.
